Summary

Python Full-Stack Developer, I specialize in crafting scalable and efficient web applications using Django, Angular, SQL, and MongoDB. With expertise in optimizing database queries and developing RESTful APIs, I've successfully enhanced application performance, reduced response times, and boosted user engagement. I'm now seeking a dynamic environment where I can leverage my technical expertise to drive innovation and growth.

Experience

Python Full Stack Developer -
Trainee(Training) November 2024 - Current

-

Hyderabad,Ameerpet *Naresh i Technology*

- Developed and deployed a Netflix Clone using Html, CSS and JavaScript attracting 50+ visitors per month.
- Designed a responsive Online food Delivery Website with optimal performance across devices, ensuring accessibility.
- Built an interactive calculator application using HTML, CSS, and JavaScript, enhancing UI engagement.
- Collaborated with team members to improve code quality and adopt industry best practices.

Projects

Personal Portfolio Website / *HTML, CSS, JavaScript*

- Displaying skills, education, experience, and contact information in a clean, responsive layout.
- Providing a downloadable resume and links to professional profiles (e.g., LinkedIn, GitHub).
- Live Preview: *Portfolio-Website*

Udemy Website Clone :

- Built a fully responsive front-end clone of the Udemy website, improving component rendering efficiency.
- Content catalog: Display a catalog of online courses with thumbnails, titles, instructor names, ratings, prices, and categories.
- Live Preview: *Udemy-Clone*
